

Paging Technique

Hubungan Antara Logical Address, Page Table, dan Physical Address

Hubungan Antara Logical Address, Page Table, dan Physical Address

- Banyaknya **page** pada logical memory akan sama dengan banyaknya **baris** (entri) pada page table
- Besarnya **page** pada logical memory akan sama dengan besarnya **frame** pada physical memory

Hubungan Antara Logical Address, Page Table, dan Physical Address

Physical Memory Size = 16 Byte

Physical Memory

2^4

Physical Memory Size = 16 Byte

2^4

Physical address space = 4 Bit

Terdapat 16 address (16 cell)

Logical Memory Size = 8 Byte

2^3

Logical Address Space = 3 Bit

Terdapat 8 address (8 cell)

Page Size = 2 Byte

2^1

Jumlah page = Logical Memory Size / Page Size

2^2

Page Address = 2 bit

Hubungan Antara Logical Address, Page Table, dan Physical Address

1000 1001	111	11
1000 1000	110	
1100 1101	101	10
1100 1100	100	
1111 0001	011	01
1111 0000	010	
1010 1011	001	00
1010 1010	000	

Logical Memory

2^3

Ada banyak data di physical memory
Milik proses lain

1000 1001	1111
1000 1000	1110
1110 0001	1101
1110 0011	1100
1111 0001	1011
1111 0000	1010
1110 0111	1001
1110 0111	1000
1100 1101	0111
1100 1100	0110
1110 0000	0101
1100 1001	0100
1100 1010	0011
1111 1111	0010
1010 1011	0001
1010 1010	0000

Physical Memory

2^4

Physical Memory Size = 16 Byte

2^4

Physical address space = 4 Bit

Terdapat 16 address (16 cell)

Logical Memory Size = 8 Byte

2^3

Logical Address Space = 3 Bit

Terdapat 8 address (8 cell)

Page Size = 2 Byte

2^1

Jumlah page = Logical Memory
Size / Page Size

2^2

Page Address = 2 bit

Hubungan Antara Logical Address, Page Table, dan Physical Address

1000 1001	111	11
1000 1000	110	
1100 1101	101	10
1100 1100	100	
1111 0001	011	01
